ASSOCIATED LARGE REVETMENTS,

BREST SAM SITE A11-2, USSR

Brest SAM Site A11-2, [redacted] is located at 52-03-10N 23-53-20E, 7.5 nautical miles (nm) east-southeast of Brest (Figure 1).

Three large revetments situated adjacent to the site perimeter road (Figures 2 and 3) were identified on KEYHOLE photography of June 1963

[redacted] One revetment, approximately 100 by 90 feet, is located about 450 feet southeast

of the center of the site; another revetment, approximately 85 by 65 feet, is about 480 feet west-southwest of the center of the site; the third, approximately 70 by 65 feet, is about 600 feet east-northeast of the center of the site. All three are generally rectangular and appear to be drive-through. Two contain unidentified objects approximately 25 feet long.

TOP SECRET RUFF

This SAM site was identified on KEYHOLE photography of December 1961 [redacted] when it appeared complete. The three revetments were not present at that time, but on KEYHOLE coverage of September 1962 [redacted] they were under construction. The revetments were next observed, and appeared complete, on the June 1963 coverage and on KEYHOLE photography of September 1963 [redacted]

[redacted] The site support area was complete when the SAM

site was identified, and no change had taken place by May 1964. The roads through the large revetments connect with the site perimeter road and have not changed since first observed on June 1963 photography.

The nearest SA-2 SAM site with similar large revetments is Brest SAM Site A03-2, located 10 nm to the north-northwest. Pruzhany MRBM Complex SAM Site B10-3 is located 36 nm to the northeast.
